PROJECTS

JumpCloud - Cloud Directory and Data Visualization (04/2022 - 06/2023)

- JumpCloud is a cloud-based directory and identity management platform that provides a comprehensive set of tools for managing user identities, devices, and access to IT resources within organizations. Here are some key aspects of JumpCloud:
- Single Sign-On (SSO):** JumpCloud offers Single Sign-On capabilities, enabling users to access multiple applications and services with a single set of credentials. This enhances security and simplifies user access.
- Directory as a Service (DaaS):** JumpCloud serves as a central directory for managing user identities, similar to traditional on-premises directory services like Microsoft Active Directory. However, it is hosted in the cloud and is accessible from anywhere.
- Multi-Factor Authentication (MFA):** Security is enhanced through MFA options, adding an extra layer of protection by requiring users to verify their identity through multiple authentication methods.

Absa Group Limited (07/2023 - Present)

- Absa Group Limited, commonly known as Absa, is a prominent financial services group based in South Africa. Here's a brief description of Absa Group Limited:
- Technologies used:** React Js, NodeJs, Python, PostgreSQL, Webpack
- Digi-loan:** worked on a digi-loan journey where user applies for loan and get it approved after filling up few forms
- handled frontend form validation and errors using **react-hook-forms** library
- created **HOC** components to keep the component reusable
- created custom hooks like **useLocalStorage**, **useAxios**, **useUpdateEffect**
